NEMANJA BAČEVIĆ

Aspiring SOC Analyst | Cybersecurity Career Transition

nemanja.bacevic.dev@gmail.com | linkedin.com/in/nemanja-bacevic-743492312 | github.com/nemanja-byte88

PROFILE

Career-changer transitioning into cybersecurity, building a hands-on foundation in Python, threat intelligence tooling, and SIEM operations, backed by completed incident-response training. Brings 11+ years of experience in high-pressure, safety-critical, customer-facing roles in the cruise and luxury retail industry - including crisis management, structured incident reporting, and cross-team coordination under strict regulatory frameworks (STCW). Self-directed learner with a project-driven approach, actively working toward a SOC Analyst role with a longer-term focus on cloud security.

CYBERSECURITY PROJECTS & TRAINING

IOC Checker - Python Threat Intelligence Tool + Web App — **Completed · Deployed**

- **Command-line tool** that checks indicators of compromise (IPs, domains, file hashes) by querying the **VirusTotal** and **AbuseIPDB** APIs.
- Handles API authentication, request/response parsing (JSON), and error handling in Python.
- Validated detection logic against a mixed test set - benign indicators (public DNS resolvers, legitimate domains) and known-malicious samples (EICAR test file hash, known Tor exit node) - to confirm accurate results before real-world use.
- Extended into a hosted web app with user authentication (**Supabase**), encrypted storage of users' own API keys, and usage tracking; deployed on **Netlify**.
- Repositories: github.com/nemanja-byte88/ioc-checker · github.com/nemanja-byte88/ioc-checker-saas

Secure FastAPI Demo - REST API — **Completed**

- Built a REST API demonstrating secure coding practices: **JWT authentication**, **bcrypt** password hashing, rate limiting, and Pydantic input validation.
- Verified with **Bandit** static analysis (SAST) - 0 findings across all severity levels.
- Repository: github.com/nemanja-byte88/secure-fastapi-demo

Python Security: Bandit SAST Demo — **Completed**

- Identified and remediated 6 CWE-classified vulnerabilities (command injection, weak cryptography, insecure code execution) in intentionally vulnerable Python code using static analysis.
- Documented before/after remediation results: 6 findings (2 High, 2 Medium, 2 Low) reduced to 1 Low-severity, informational finding.
- Repository: github.com/nemanja-byte88/python-security-bandit-demo

Home SIEM Lab - Wazuh — **In progress**

- Built a **Wazuh** SIEM home lab in VirtualBox (Ubuntu Server manager + Windows 11 agent) to practice log ingestion and detection fundamentals.
- Deployed **Sysmon** (SwiftOnSecurity config); events flow into Wazuh with MITRE ATT&CK mapping. Next: attack simulation to test detections.

TryHackMe - Incident Response Room — **Completed**

- Worked through a full IR lifecycle: containment, eradication, credential rotation, lifting isolation, and post-incident monitoring.
- Practiced incident timeline reconstruction and event categorization exercises.

Weathervane - Full-Stack Weather Web App — **Completed · Deployed**

- Multi-tab web app with real-time sunrise/sunset-based visuals and Beaufort wind scale integration; deployed on **Netlify**, version-controlled on **GitHub**.
- Applied image optimization (WebP, base64 embedding) and resolved Git merge conflicts.
- Repository: github.com/nemanja-byte88/Weathervane_ultimate

Ultimate Calculator - Python Application — **Completed · Deployed**

- Evolved a terminal script into a GUI (Tkinter) and then a responsive single-file web app; deployed on **Netlify** and published on **GitHub** with full documentation.
- Repository: github.com/nemanja-byte88/Ultimate-Calculator

TECHNICAL SKILLS

Languages & Tools: Python, Git/GitHub, VS Code, Windows PowerShell, HTML/CSS/JS (basic), Supabase

Security: SIEM fundamentals (Wazuh, Sysmon), Threat Intelligence APIs (VirusTotal, AbuseIPDB), Incident Response lifecycle, Networking fundamentals

Currently developing: Blue Team fundamentals via TryHackMe, working toward an industry-recognized cybersecurity certification

PROFESSIONAL EXPERIENCE

Box Office Agent - Virgin Voyages, USA **2022 – Present (Contract)**

- Operate MXP and ARS systems daily for event ticketing, troubleshooting, and point-of-sale transactions — including case-by-case discounts, refunds, and charge adjustments requiring accurate judgment under time pressure.
- Send real-time guest-facing push notifications via ARS to communicate event changes and updates.
- Support rapid response during show-stop incidents (e.g., display panel failures) - coordinating with the team to restore systems and resume live performances with minimal delay.
- Assist Production Stage Management (PSM) with on-site logistics, including stage adjustments and minor technical fixes during live events.
- Completed training and data-management modules on the Elevate platform for team development.

Effy Brand Ambassador - Carnival Cruise Line, USA **2021 – 2022**

- Coordinated daily operations and reporting across a multi-department team in a fast-paced, regulated environment.
- Produced structured daily and weekly reports covering strategy, performance, and incidents encountered — with proposed solutions for recurring issues.

Certified Jewelry & Watch Specialist - LVMH (Louis Vuitton), USA **2018 – 2021**

- Trained new hires and maintained compliance with strict corporate/brand operating standards across multiple ship launches.
- Maintained and improved a CRM database, with a focus on data accuracy and quality control — directly transferable to log/data hygiene practices in a SOC environment.

Merchant Marine Officer Training - Navigation, Safety & Evacuation Officer **2018 – 2021**

- Trained to assess, escalate, and respond to safety-critical incidents under strict international (STCW) regulatory standards - a direct parallel to incident triage and escalation procedures in a SOC.

Sales Supervisor - Samsung Experience Store, Belgrade, Serbia **2007 – 2010**

- Supervised staff, resolved operational issues, and maintained accurate reporting on inventory and sales.

EDUCATION

Bachelor of Economics - Marketing & Management in Tourism and Hospitality · Singidunum University, Belgrade, Serbia (2011)

CERTIFICATIONS & TRAININGS

STCW 95 · Personal Survival Techniques · Elementary First Aid · Personal Safety & Social Responsibilities · Crisis Management & Human Behavior · Crowd Management · Fire Prevention & Fire Fighting (Carnival Cruise Line)

LANGUAGES

Serbian (native) · English (fluent) · Spanish (fluent)
